YG1001

P01 - P10
K10 - K25

First choice for stable machining of Cast iron

- Substrate especially designed for high wear resistance
- Thick Al₂O₃ layer ensures good wear resistance at high cutting speeds including dry machining

YG3010

P05 - P20
K15 - K35

First choice for Finishing Steels, and Ductile Cast iron

- Finishing and light machining of steel under in stable condition
- New Al₂O₃ coating technology and excellent surface smoothness increase wear resistance and chipping resistance

NEW

YG3015

P10 - P25

Balanced productivity for Continuous cut

- High wear resistance and improved toughness ensures high productivity with less trouble

YG3020

P15 - P30

First Choice grade for general Steel application

- Substrate especially designed for good toughness
- Excellent surface smoothness increases wear resistance and reliability

YG3030

P20 - P35
M10 - M30

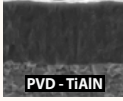

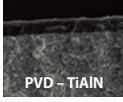

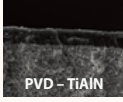

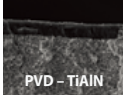

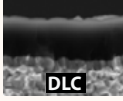

Interrupted cut of Steel and Stainless steel

- Heavy interrupted cut for Steel
- High cutting speed for Stainless steel
